

Wye Fittings

A true Wye fitting Engineered for closed system instrumentation pigging configurations or wherever a smooth pipe branch is required.

Features include:

- ANSI 150# to 2500# and beyond
- NPS 3" to 8"
- Smooth, extra long radius
- Uninterrupted junctions free from sharp edges and ovality permit unimpeded pig travel

Material availability:

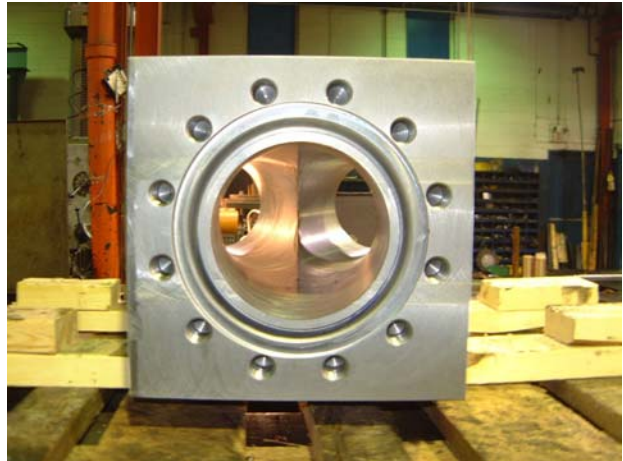

Made from block forgings, Wye fittings can be supplied in virtually any size material, from carbon steels to titanium or zirconium.

End connections:

- Buttweld
- BlueSky Clamp Pipe Connector
- RF or RTJ Flange
- Special to suit application

6" 900# A350 LF2 Wye with clamp pipe connectors

Smooth blending of flow ports
